TAIYO YUDEN's **Business Fields**

TAIYO YUDEN presents various solutions with passive components as their core in the world's electronics field.

equipment

equipment 22%

TAIYO YUDEN's business coverage in the electronics parts field (TAIYO YUDEN makes products in the red characters.) Semiconductor devices, integrated circuits, electron tubes, etc. Devices that apply functions of electrons to perform active tasks such as amplification **Passive** Capacitors, inductors, resistors, components transformers, and others Components that work with and supplement These devices store, control, separate, and do other work on provided electronic energy. electronic devices Connecting components switches, connectors, and others These devices connect, switch, and do other work on electronic circuits and systems. Electroacoustic transducers, compact motors, and others These devices create sounds, torques, magnetic flux, and others. **Consumer products** Other electronic Flat-screen TVs and power-supply components Digital cameras Source: the Japan Electronics and Information Technology Industries Association Game machines **Automobile Navigation systems** Telematics **Information equipment** Engine control units **Passive components** Tablet devices and other electronic PCs Multilayer components **Industrial Equipment** Surveillance cameras Smart meters **Communication** SAW/FBAR equipment Smartphones Mobile phones **Medical and Healthcare** Blood pressure meters Patient bed sensors Health check-ups Automobiles Components Optical media and others and industrial **Environmental and Energy** products equipment 13% Solar power generators electronic Consumer Electric bicycles components products Electric vehicles ov market sector 22% (Year ended Communication Information
