Fourth Report on Measures to Prevent the Spread of the Novel Coronavirus (COVID-19)

Tokyo, May 29, 2020—Based on its business continuity plan (BCP), TAIYO YUDEN is implementing a range of measures to prevent the spread of the novel coronavirus and ensure the health and safety of its employees, business partners and other stakeholders.

Following the full lifting of the state of emergency across the country by the government, our employees at the Sendai, Nagoya, Kansai and Fukuoka Sales Offices, who had been working from home in principle, are gradually restarting working at their offices. Also, regarding the head office (Chuo-ku, Tokyo), employees will gradually restart working at the office on and after June 1.

We would like to express our deep gratitude to all stakeholders for their kind understanding of and cooperation with our operations conducted with employees working from home. We will continue to implement the existing anti-infection measures that we have been taking and reduce the risk of infection by avoiding the so-called Three Cs (Closed spaces, Crowded spaces and Close-contact settings) by implementing measures such as remote working and staggered commuting, thereby ensuring our business continuity as an electronic component manufacturer for the maintenance and improvement of social infrastructure and people's daily lives.
