TAIYO YUDEN Announces the Release of the 2022 Safety & Environmental Report *A Report of TAIYO YUDEN's Safety and Environment Activities in FY2021*

TOKYO, July 29, 2022 — TAIYO YUDEN CO., LTD. announced today the release of its 2022 Safety & Environmental Report which contains the results of its safety and environmental efforts accomplished in FY2021.

TAIYO YUDEN has published annual Environmental Reports since 2002. This report outlines the Companies efforts and related results on meeting the safety and environmental standards set by the Company. Since 2005, TAIYO YUDEN has been publishing its annual Safety & Environmental Report, which contains additional information relating to occupational health and safety.

We have revised upward our medium-term environmental targets, raising the greenhouse gas (GHG) emissions reduction rate for FY2030 to 42% compared to FY 2020. This was based on our decision to accelerate our climate change actions in response to the global commitment adopted at COP 26 in October 2021 to limit global warming to 1.5 degrees Celsius compared to pre-industrial levels.

Also, we have developed and enhanced systems related to climate change, specifically to analyze risks posed and opportunities created by the issue in association with our businesses, as well as to ensure governance and risk management, following recommendations provided by the Task Force on Climate-Related Financial Disclosures (TCFD), an establishment of the Financial Stability Board (FSB). The related information is presented in the 2022 Safety & Environmental Report in reference to the disclosure framework set by the TCFD.

TAIYO YUDEN strives for continuous growth and the fulfillment of its corporate social responsibilities. TAIYO YUDEN recognizes that efforts toward safety and the environment are an integral part of how we conduct our business and an important responsibility that we are fully committed to meeting. We shall continue to promote safety and environmental activities from a global perspective.
