1. OUR STORY

TAIYO YUDEN's Value Provision

TAIYO YUDEN is expanding the scope in which it provides value toward the creation of a prosperous society

TAIYO YUDEN Main Products ▶ p.36 At a Glance **Sales Composition** by Market Sector **Others Capacitors** TAIYO YUDEN offers aluminum electrolytic capacitors Capacitors are used in a wide variety of electronic that are optimal for mounting on automobiles that equipment to temporarily store electricity and remove increasingly incorporate electronic systems. electronic noise. TAIYO YUDEN excels in producing leading-edge, highly-reliable multilayer ceramic capacitors which are best suited to cutting-edge electronic devices including smartphones and automobiles, and large numbers of multilayer ceramic capacitors are loaded into such devices. Integrated Modules 11% Inductors & Devices Inductors are used in electronic equipment power and high-frequency circuits for blocking alternating current The Integrated Modules & Devices classification's main while allowing direct current to pass through. products are FBAR/SAW devices for communications, which are used primarily in smartphones to enable high-speed and high-quality data communications

TAIYO YUDEN's products are used across a wide range of fields. For example, our multilayer ceramic capacitors, a mainstay product, are used in common everyday products such as smartphones, PCs, tablet devices, game consoles, wireless earphones, etc. In recent years, the impact of generative AI and other digitally transformative technologies have been spreading to our daily lives, as automobiles and other various products become computerized and electrified. This trend is promoting the expansion of the scope in which we provide value as a company that develops essential products for such technological advancement.
